## **Product Specifications**

| Product:<br>Description: | Goat anti-Human IgG + IgA + IgM, F(ab)'2 Fragment - Affinity Pure<br>Goat anti-Human IgG + IgA + IgM, F(ab)'2 Fragment - Affinity Pure, FITC<br>Conjugate |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| Part Number:             | GtxHu-010-GFITC                                                                                                                                           |
| Concentration:           | 1.50 mg/ml (E 1% at 280 nm = 13.0)                                                                                                                        |
| Amount:                  | 0.5 mg                                                                                                                                                    |
| Conjugate:               | Fluorescein-5-isothiocyanate (FITC) Amax = 494 nm; Emax = 518 nm                                                                                          |
| Form:                    | Clear, fluorescent yellow liquid                                                                                                                          |
| Purification:            | Affinity purified using solid phase Human IgA + IgG + IgM                                                                                                 |
| Purity:                  | > 90% based on SDS-PAGE Small amounts of intact IgG may be present.                                                                                       |
| Host:                    | Goat                                                                                                                                                      |
| Immunogen:               | Purified human IgG + IgA + IgM, whole molecule                                                                                                            |
| Buffer:                  | 10 mM Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2, 1 % (w/v)                                                                                         |
|                          | BSA, Protease/IgG free                                                                                                                                    |
| Preservative:            | 0.05% (w/v) Sodium Azide                                                                                                                                  |
| Storage:                 | 2-8 °C                                                                                                                                                    |
| Shelf Life:              | 1 year from date of receipt. Prepare working dilution prior to use and then                                                                               |
|                          | discard.                                                                                                                                                  |
| Specificity:             | Based on IEP, this antibody reacts with:                                                                                                                  |
|                          | <ul> <li>heavy chains on human IgA + IgG + IgM</li> </ul>                                                                                                 |
|                          | <ul> <li>light chains on all human immunoglobulins</li> </ul>                                                                                             |
| Cross Reactivity:        | Based on IEP, no reactivity is observed to:                                                                                                               |
|                          | <ul> <li>non-immunoglobulin human serum immunoglobulins</li> </ul>                                                                                        |
| Country of Origin:       | Goat serum was obtained from healthy animals of US origin and under the                                                                                   |
|                          | care of a registered veterinarian.                                                                                                                        |
| Applications:            | Flow Cytometry                                                                                                                                            |
|                          | Immunofluorescence                                                                                                                                        |
|                          | ELISA                                                                                                                                                     |
|                          | Immunomicroscopy                                                                                                                                          |
| Disclaimer:              | For <i>in vitro</i> Laboratory Use Only. Not for diagnostic or therapeutic use. Not                                                                       |
|                          | for human or animal consumption. Suggested applications of our products                                                                                   |
|                          |                                                                                                                                                           |
